

# Feedsack Fancy

Quilt size: 38"x50"

This kit contains 47 different 5" authentic vintage feedsack squares and 1-1/2 yards of yellow solid fabric; enough for the top of the quilt and the binding. The feedsack squares have been pre-washed. While every care has been taken in the cutting, because they are vintage, there may be the occasional spot or tiny hole from the sack stitching. This is just a sign of authenticity—go ahead and use those pieces in your feedsack quilt!

## Directions for Blocks

**Step 1** Cut each feedsack square in half; into 2—2-1/2" x 5" rectangles. See A.

**Step 2** Choose two different rectangles to sew together on the long edges to make a strip set that equals 4-1/2" x 5". Press. Cut into 2—2-1/2" x 4-1/2" rectangles. See B

**Step 3** Sew the two pieces together to form a four-patch. Repeat to make a total of 35 four-patches. See C

**Step 4** Cut the remaining rectangles into 2-1/2" squares for corner stones.

## Directions for Sashing and Borders

**Step 1** From yellow solid cut 10—2-1/2" strips. Cut into 82—2-1/2" x 4-1/2" rectangles for sashing.

**Step 2** Sew together 7 rows with 5 four-patches and 6 yellow sashes. Press toward the sashes.

**Step 3** Sew together 8 rows of 5 sashings and 6 feedsack corner stones. Press toward the sashing.

**Step 4** Sew the block rows and sashing rows together, pressing the seams toward the sashing rows.

**Step 5** Cut 4—3-1/2" wide border strips. Measure, cut, then sew the borders to the quilts, piecing borders as needed. Press toward the borders.

## Finishing the quilt

Mark any quilting designs, layer, then quilt. The quilt shown was hand-quilted 1/4" inside each of the feedsack squares. A square on point was drawn around each four-patch, resulting in an interesting sashing design that was easy to quilt. A simple cable design was quilted in the border. Hand-baste a scant 1/4" from the edge to keep the layers from shifting.

Cut 5—2-1/4" strips for double binding. Join with diagonal seams pressed open. Sew to the quilt with a 1/4" seam, mitering the corners. Trim excess batting and backing; turn the binding to the back side and stitch down by hand.
